How to prepare for a siding project and what to expect

1. KEEP CHILDREN AND PETS AWAY FROM WORK AREA. DANGER KEEP OUT!
2. Be prepared for the noise. Crews generally start early in the morning. There will be constant hammering during the construction process.
3. Remove all loose items from wall shelves and walls. Hammering creates vibrations that may cause items to shift, move and fall.
4. **Remove all items from around the exterior of your home where work will be completed.** All reasonable efforts are made to protect personal items and landscaping, but construction debris will fall and cause damage to these items. Atlas will be held harmless from any damage to items not moved from the work area.
5. Access to your parking lot/driveway will be needed to load and unload materials and for job site cleanup.
6. Large delivery trucks may be needed to load and unload materials and dumpsters. This will impact your ability to move in and around the exterior of your home. Please use caution while your home is being worked on.
7. The use of power tools may be needed to complete the approved work. Access to an outlet may be needed. **Please notify us if you have any concerns about this.**
8. Daily cleanup of the job site will be completed. Every effort to pick up nails is made. Magnetic rollers are used, but a few nails may be hidden in the grass.
9. Communication and responsiveness is a top priority. Please feel free to contact us with any questions or concerns you may have. Our mission is to provide high-quality work with as little impact on your community as possible.

Thank you in advance for your patience and understanding.
