

Build up asphalt
and make flush
with concrete

*Install speed bump
at last garage to help
enhance drainage

Note: All garage aprons will be removed and paved with asphalt to help increase drainage

A photograph of a residential driveway. On the left is a light blue building with several white garage doors. A concrete sidewalk runs along the building. In the background, a dark grey pickup truck is parked on the asphalt driveway. A yellow arrow points from the text towards a concrete panel on the driveway. The text is in yellow and reads: "Remove Concrete panel and add berm in front of maintenance garage remove concrete panel under Pick up".

**Remove Concrete panel
and add berm in front of
maintenance garage
remove concrete panel
under Pick up**

saw and remove curb
ends if needed

Remove &
Replace 150 SF of
